did you know...

IEL Security & Monitoring has been in business over 23 years, serving the Cayman Islands. We take pride in providing our customers with the best possible equipment and service.

You can take comfort knowing that our local alarm monitoring center will be watching over your most valued assets 24 hours a day, every day of the year. At IEL Security & Monitoring, we are your partner in safety and security.

Burglary Prevention

There has never been a more critical time to protect your family, property and personal possessions. Official Police crime statistics for January 2008 through to October 2008 indicate that Burglary represents some 21% of all crimes committed in Grand Cayman. During this period in excess of 400 burglaries were committed, some 40 crimes per month. The preferred method of forced entry is through perimeter windows and in some cases the front door. Residences are targeted more than commercial premises and Wednesday and Thursday appear to be the most likely days of the week for a burglary to occur.

The losses and strong feelings of violation and vulnerability that follow can be devastating. By taking preventative steps and developing the right habits, you can reduce your chances of becoming a target.

Securing your home begins right at your front door! Make sure you have sturdy locks and that every family member is in the habit of locking the door. Even when you're working in the yard, keep doors locked. A burglar can be in and out of your home in just a few minutes. Don't give burglars any place to hide – keep shrubs trimmed, and use outdoor lighting around your home.

If you arrive home and it appears that your home has been broken into, do not go inside – call the police immediately. If you hear a burglar at night, stay in bed and pretend to be asleep. Most often a burglar will want to take valuables and leave unnoticed.

We are committed to helping you and your family stay safe. To learn more about how you and your loved ones can avoid becoming victims, please contact us for a free consultation with one of our security and life safety specialist.

Home Security Tips

Get a Home Security System

This alone will reduce your chances of being broken into by 3 to 4 times. Be sure to advertise that you have a security system in your home. It's much easier for a burglar to go to the house down the street that doesn't have a monitored home security system than to risk being caught breaking into a house that does.

Let Your Friends and Neighbors Know

Make sure your neighbors know you have monitored home security service.

Clear Out Obstacles

Limiting things in your yard that block the view from your house to the street is a great way to enhance your home security service.

Outdoor Lighting

Lights are a great way to improve on your home security.

Update Old Locks

One of the best home security steps you should take when moving into a new home is replace all of the main locks.

Lock Your Windows

This is an easy one but it's often overlooked. Always make sure all the windows in your house are closed and securely locked.

Glass Doors

Doors with large glass panes in them are very attractive but are also major home security risks. No matter how good the lock on the door is, someone can easily break the glass to gain entry into your home. Get a glass break detectors or additional motion detectors for your home security system and place them by the doors.
